

## **Lake States Fires Science Consortium Internship Proposal Review Criteria – 2019**

1. Does the proposed study fall within the LSFSC and northern Lake States Region?
2. Is there a clearly articulated fire and/or management issue? Is this an important fire and/or management issue?
3. At what scale is the issue relevant? While local issues are fine, the broader the application of the potential proposal the better.
4. Is there a clear plan of action that will help ensure success of the project, and how the intern will help accomplish this plan of action?
5. Are there clear deliverables and a reasonable timeline to complete the proposed project?
6. To what extent does the proposal meet the following goal: Create a unique training experience for the intern that will enable that person to more easily work across traditional boundaries impeding integration of fire research and management in the Lake States Region?
7. To what extent does the proposal meet the following goal: Facilitate development of a new or emerging cooperative project between research and management in the area of fire ecology and/or implementation?
8. Is there a clear indication that the proposal stems from a collaborative effort between a manager-scientist team, and is there a plan for this collaborative team to continue beyond the internship program?
