

# Smoke Tools

## A one-day workshop

March 29, 2017 at the Midwest Interagency Fire Center, Grand Rapids MN

At SFEC's December 2016 Fire in Minnesota's Forests workshop, the issue of smoke management during prescribed burns came up. We are offering a one-day hands-on indoor workshop reviewing available online tools and techniques to predict and manage smoke on your prescribed burns or on wildfire response.

You will need to bring a laptop, power cord, and information from burns on your home unit in order to use the online tools during the workshop.

This workshop is offered at no charge thanks to sponsorship from the US Forest Service, the Midwest Interagency Fire Center, the Lake States Fire Sciences Consortium, and the University of Minnesota.

Note: Space is limited and you must register to attend. Lunch will not be provided.

**Date:** Wednesday March 29, 2017 from 8:30 a.m. until 4:00 p.m.

**Location:** Midwest Interagency Fire Center, Grand Rapids, MN

**Instructor:** Trent Wickman, US Forest Service, Eastern Region

**Cost:** Free, but you must register to attend

**Items to bring:** laptop, power cord, lunch

**Details and registration:** <http://z.umn.edu/smoketools>
